

## Our Vision and Principles

**Our vision for science is to create a sense of awe and wonder, that encourages all children to be inquisitive about the world around them and equips them with the skills and knowledge they need to become young scientists.**

**We know science in our school is good when...**

It is exciting and we have fun while we learn!

We are curious and want to find out more!

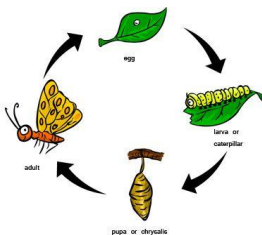

It is practical and messy and we can investigate and do things ourselves!

We can all do it but it is challenging and makes us think.

We can see how it links to real life and the world around us.

We can explain what we have learnt using the correct vocabulary.
